

## CLAIMS

1. A method implemented by a television set-top terminal ("STT") comprising the steps of:  
providing a list of video presentations;  
5 receiving viewer input configured to select one of the video presentations from the list of  
video presentations;  
associating the selected video presentation with a reminder list responsive to receiving the  
viewer input; and  
responsive to associating the selected video presentation with the reminder list, providing  
10 reminder information to the viewer, the reminder information being configured to remind the  
viewer that the selected video presentation will no longer be available for rent via the STT after a  
predetermined time.
2. The method of claim 1, wherein the step of providing reminder information is performed  
15 responsive to viewer input requesting access to the reminder list.
3. The method of claim 1, wherein the step of providing reminder information is performed  
responsive to viewer input requesting access to a list of presentations currently available for rent.
- 20 4. The method of claim 1, wherein the step of providing reminder information is performed  
via a barker.
5. A television set-top terminal (STT) comprising:  
memory configured to store program code; and  
25 a processor programmed by the program code to enable the STT to:  
associate a video presentation with a reminder list responsive to receiving viewer  
input; and  
provide reminder information to the viewer, the reminder information being  
configured to remind the viewer that the video presentation will no longer be available for rent via  
30 the STT after a predetermined time.
6. The STT of claim 5, wherein the processor is programmed by the program code to  
provide the reminder information responsive to viewer input requesting access to the reminder  
list.

35

7. The STT of claim 5, wherein the processor is programmed by the program code to provide the reminder information responsive to viewer input requesting access to a list of presentation currently available for rent.
- 5 8. The STT of claim 5, wherein the processor is programmed by the program code to provide the reminder information via a barker.
